

MELTING & CASTING EQUIPMENT

We are a trusted global partner, delivering large-scale thermal processing systems that meet the highest standards of efficiency and quality.

- Melting & Casting Equipment
- Scrap Buckets
- Ladle Transfer Cars
- Roll Transport Trolleys
- Electric Arc Furnace
- Shaft Holders
- Dummy Bar
- Rolling Mill Components

**IRON STEEL
INDUSTRY**

"POWER BEHIND THE INDUSTRY"

SCRAP BUCKETS

Highly Efficient Solution for **Scrap Metal Handling**

Our Scrap Buckets come in various sizes and configurations to accommodate different scrap metal sizes and weights.

They can be easily attached to various types of machinery, such as excavators, loaders, and cranes, making them highly adaptable to different worksites.

The versatility of scrap buckets allows for efficient handling of different types of scrap metal, including steel, iron, aluminum, and copper. This adaptability streamlines the scrap metal management process and increases the overall operational flexibility.

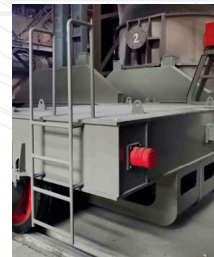

LADLE TRANSFER CARS

Engineered by SESAN for the demanding conditions of the iron and steel industry, our scrap bucket transfer car offers a reliable, heavy-duty solution with robust structure, high performance, and operational safety at its core.

Technical Features :

- **Load Capacity:** 50 to 300 tons (customizable)
- **Drive System:** Electric motor with VVVF drive
- **Rail Compatibility:** Straight track (custom curves available)
- **Chassis:** High-strength steel construction
- **Safety:** Shock absorbers, lifting lugs, visible safety markings
- **Coating:** Industrial-grade paint resistant to heat and impact

OTHER EQUIPMENT

High-Performance Equipment for **Heavy-Duty Steel Plants**

Sesan Industry designs and manufactures heavy industrial equipment tailored to the extreme operational conditions of the iron and steel sector.

Products We Design and Manufacture :

- Dummy Bar
- Shaft Holders
- Gear Boxes
- Bunkers
- Trolleys
- Rolling Mill Components
- Electric Arc Furnace
- Ingot Cars
- Segment Manipulators
- Hoisting Equipment
